

## Cummings School of Veterinary Medicine

Dear External Pre-Clinical Selective Site Participant/Mentor:

Thank you for your participation, past and present, in our external Pre-Clinical Selectives Program for first, second and third year Cummings School of Veterinary Medicine students. This program has been a tremendous success and has proven to be an invaluable tool helping our students to hone their clinical and research skills. You have offered not only a first-hand look, but much more importantly, mentoring and a hands-on training opportunity to our students. You have played an important role in molding them to be the very best in the veterinary medical field.

In order for Cummings School of Veterinary Medicine students to receive selective credit please fill out the attached Cummings School of Veterinary Medicine form. For your convenience, also attached is the "Pre-Clinical Selective Add or Change Form". The purpose of this form is to add a selective or to change a current selective listed in our Pre-Clinical Selectives Guide. The guide is used by our students when making a selective choice. Both forms may be mailed or faxed as indicated on the forms.

Again, thank you for your support of our Cummings School of Veterinary Medicine students.

Sincerely,

A handwritten signature in black ink that reads "Deborah T. Kochevar".

Deborah T. Kochevar, DVM, PhD  
Dean

A handwritten signature in black ink that reads "Nick Frank".

Nick Frank, DVM, PhD, DCVIM
